

Geekathon

FROM WASTE TO VALUE

Get your inner geek on and add fuel to your innovative fire. At the Geekathon you will spend two intense days using your skills in cooperation with other bright researchers and students from the Natural and Technical Sciences. Together you will work with ideas and solutions for a sustainable future.

The focus of the Geekathon is Circular Economy – you will use your competencies to explore and develop ideas for products or solutions that can be shared, reused, repaired or recycled and thereby not creating waste that pollutes the planet.

We will provide everything you need for the Geekathon – just bring your self and your skills.

When: November 5-6, 2021
Where: The Kitchen –
AU Entrepreneurship Hub,
Building 1740
Sign up: [HERE](#)
